

STATE OF CHILD CARE DURING COVID-19

CHILD CARE LANDSCAPE

Licensed child care generally falls into two categories: child care centers (CCCs) and family child care homes (FCCs). Child care centers activities take place in classroom settings for children of similar ages. Family child care takes place in a provider's home and children are cared for in a family-like setting, in mixed age groups, and with day-to-day activities mirroring those in child care centers.

COVID-19 has made lack of access to child care critical but it has not created it. This crisis, and the data that follow, represent an opportunity to build back better and create a child care infrastructure where providers and children alike can thrive.

CLOSURES DUE TO COVID-19

Since March 2020, some child care providers across Ventura County closed due to COVID-19. Closures peaked in May 2020, with 75% of Child Care Centers and 23% of Family Child Care Homes.
